

REQUEST FOR PROPOSAL

Data Center Infrastructure Upgrade

Tender Reference	TND-IT-001
Issued By	Mushtary Test Buyer
Issue Date	02/06/2026
Submission Deadline	30/06/2026 @ 11:00 AM KSA Time
Proposal Validity	90 days from the proposal submission deadline
Bid Security	Required. Bid security amount: 2% of submitted bid value.
Performance Bond	Required. Performance bond amount: 5.0% of contract value. Validity: the full implementation period and the 3-year warranty/support period.
Evaluation Model	70% Technical / 30% Financial
Minimum Technical Score	70%
AI Governance	This tender was generated by Mushtarry AI and must be reviewed and approved by Buyer-Admin before publication.
Generated	2026-06-02 15:58 UTC
Trace ID	trace_96cd772bb5ba48b2babd8ed4fac92c04

PENDING BUYER APPROVAL

This tender cannot be published until reviewed and approved by the authorized Buyer-Admin.

1. Tender Data Sheet

Tender Title	Data Center Infrastructure Upgrade
Tender Reference	TND-IT-001
Buyer Entity	Mushtary Test Buyer
Procurement Category	Information Technology / IT Infrastructure & Data Centers
Tender Type	Request for Proposal (RFP)
Procurement Method	Invited Tender
Submission Method	Mushtarry platform only
Issue Date	02/06/2026
Site Visit	Recommended / optional. Site visit date: 08/06/2026.
Clarification Deadline	12/06/2026
Submission Deadline	30/06/2026 @ 11:00 AM KSA Time
Opening Date	30/06/2026
Proposal Validity	90 days from the proposal submission deadline
Bid Security	Required. Bid security amount: 2% of submitted bid value.
Performance Bond	Required. Performance bond amount: 5.0% of contract value. Validity: the full implementation period and the 3-year warranty/support period.
Contract Duration	90 days implementation + 3 years warranty/support
Warranty Duration	3 years
Language	Arabic and English; Arabic takes precedence in case of conflict.
Evaluation Model	70% Technical / 30% Financial
Minimum Technical Score	70%

2. Introduction

About the Organisation

Mushtary Test Buyer is issuing this tender through the Mushtarry platform. Mushtary Test Buyer requires a qualified IT infrastructure vendor to upgrade its data center environment in Riyadh, Saudi Arabia.

Background

The buyer intends to procure services under the category 'Information Technology - IT Infrastructure & Data Centers'. The procurement is required to support operational resilience, technical modernization, cybersecurity readiness, and business continuity.

Purpose of this RFP

The purpose of this Request for Proposal is to invite qualified vendors to submit technical and commercial proposals for 'Data Center Infrastructure Upgrade'. The selected vendor will be expected to deliver the required scope of work, meet all eligibility and document requirements, and comply with the tender's technical, commercial, legal, and submission rules.

3. Instructions to Bidders

3.1 Submission Rules

- All proposals must be submitted through Mushtarry platform only.
- Hard copy submissions will not be accepted unless explicitly allowed by the buyer.

- Bidders must submit separate Technical and Commercial proposals.
- The Technical Proposal must be submitted in PDF format.
- The Commercial Proposal must be submitted in PDF/Excel format.
- Each uploaded file must not exceed 50 MB unless otherwise approved by the buyer.
- The platform may perform completeness checks before final submission.
- Bidders may revise and resubmit proposals before the official submission deadline. Each resubmission creates a new retained version.
- Submitted proposals will be locked after the official deadline.
- Late submissions will not be accepted.
- The official submission time shall be the timestamp recorded by the Mushtarry platform.
- All proposals must be signed and stamped by an authorized representative of the bidder.
- The bidder is responsible for ensuring that all required documents are complete, valid, and readable.
- The buyer reserves the right to reject incomplete, non-compliant, or misleading submissions.

3.2 Timetable

RFP Issue Date	02/06/2026
Clarifications Deadline	12/06/2026
Proposal Submission Deadline	30/06/2026 @ 11:00 AM KSA Time

3.3 Clarifications Process

All clarification requests must be submitted through the Mushtarry platform before the clarification deadline. Clarifications issued by the buyer through the platform shall form part of the tender record. If a site visit is conducted, the clarification deadline should remain open after the site visit so bidders can raise site-visit-related questions.

3.4 Proposal Validity

Proposals must remain valid for 90 days from the closing date.

3.5 Confidentiality

All tender information, buyer data, technical specifications, documents, and bidder submissions shall be treated as confidential and used only for the purpose of this procurement.

3.6 Conflict of Interest

Bidders must disclose any actual, potential, or perceived conflict of interest. The buyer may reject or disqualify a bidder where a conflict compromises fairness, integrity, or independence of the procurement process.

3.7 Cancellation Rights

The buyer reserves the right to cancel, amend, suspend, extend, partially award, or reject all proposals at any stage, subject to applicable procurement rules and buyer approval.

3.8 Platform Submission Controls

Platform Submission Only	Yes
Separate Technical / Commercial	Yes
Technical File Format	PDF
Commercial File Format	PDF/Excel
Maximum File Size	50 MB
Resubmission Before Deadline	Yes
Submission Lock After Deadline	Yes
Late Submission Allowed	No
Completeness Check Required	Yes
Official Timestamp	Mushtarry platform timestamp is official

- Submission is permitted only through the Mushtarry platform.
- Technical and Commercial proposals must be submitted separately.
- Mandatory document completeness may be checked before final submission.
- Resubmissions before the deadline create updated proposal versions.
- Final submitted proposals are locked after the deadline.
- Late submissions are not allowed.
- The Mushtarry platform timestamp is the official submission timestamp.

4. Award and Contract

4.1 Evaluation Process

Proposals will be reviewed in stages: mandatory pass/fail compliance, technical evaluation, financial evaluation, AI-assisted recommendation where enabled, and final buyer approval. AI outputs are advisory only and do not replace buyer decision-making.

4.2 Negotiation Policy

The buyer may negotiate with one or more shortlisted bidders regarding technical scope, commercial terms, implementation details, or contractual clarifications before final award.

4.3 Award Rules

Award shall be based on mandatory compliance, technical and financial evaluation parameters, commercial acceptability, buyer approval, and final contract execution. The buyer may reject non-compliant or incomplete proposals.

4.4 Bid Security

Required. Bid security amount: 2% of submitted bid value.

4.5 Performance Bond

Required. Performance bond amount: 5.0% of contract value. Validity: the full implementation period and the 3-year warranty/support period.

4.6 Saudization Requirements

The bidder shall comply with all applicable Saudization, labor, and local content requirements. Where Saudization is relevant to the tender, the bidder should clearly state the proposed Saudi national participation, local support capability, and compliance evidence.

5. Vendor Document Requirements

5.1 Document Governance Rules

- Mandatory documents are required to qualify the vendor for this tender.
- Mandatory-if-applicable and conditional documents are required only where they apply to the vendor type, buyer type, sector, or regulatory context.
- Missing conditional or sector-specific documents may result in limited eligibility or buyer/manager review, rather than automatic rejection, unless the buyer defines them as mandatory for this tender.
- Optional documents are not mandatory but may improve buyer confidence, eligibility, and AI category inference.
- All submitted documents must be valid, readable, and aligned with the vendor's legal identity.
- Expired mandatory documents may place the vendor under review.
- All document validation actions and decisions must be auditable.

5.2 Documents Required for this Tender

- Commercial Registration (CR)
- National Address Certificate
- Authorized Signatory ID
- Authorization Letter / Power of Attorney
- IBAN Certificate / Bank Letter
- Articles of Association (AOA)
- VAT Registration Certificate
- Zakat & Tax Certificate

- Brand Registration Certificate
- MISA Investment License
- GOSI Certificate
- Saudization (Nitaqat) Certificate
- CITC / CST License
- CST / NCA License or Compliance Evidence
- Company Profile
- ISO Certifications
- Past Project References
- Client Recommendation Letters

5.3 Mandatory Documents

- Commercial Registration (CR)

Category: Legal & Registration | Applicability: All vendors | Issuing Authority: Ministry of Commerce | Notes: Must be valid and active.

- National Address Certificate

Category: Legal & Registration | Applicability: All vendors | Issuing Authority: SPL / Wasel | Notes: Must match CR details.

- Authorized Signatory ID

Category: Identity & Authority | Applicability: All vendors | Issuing Authority: National ID / Iqama | Notes: Saudi National ID or Iqama for authorized signatory.

- Authorization Letter / Power of Attorney

Category: Identity & Authority | Applicability: All vendors | Issuing Authority: Company-issued / notarized if required | Notes: Must confirm signing authority; company-stamped and signed.

- IBAN Certificate / Bank Letter

Category: Banking & Financial | Applicability: All vendors | Issuing Authority: Bank | Notes: Must match the company legal name.

5.4 Mandatory-if-Applicable / Conditional Documents

- Articles of Association (AOA)

Category: Legal & Registration | Applicability: If applicable | Issuing Authority: Ministry of Commerce / Company records | Notes: Latest version reflecting current ownership and activities.

- VAT Registration Certificate

Category: Legal & Registration | Applicability: If VAT-registered | Issuing Authority: ZATCA | Notes: Mandatory if the vendor is VAT-registered.

- Zakat & Tax Certificate

Category: Legal & Registration | Applicability: If applicable | Issuing Authority: ZATCA | Notes: Valid clearance certificate where applicable.

- Brand Registration Certificate

Category: Legal & Registration | Applicability: If brand name is used | Issuing Authority: SAIP | Notes: Required if bidding under a registered brand.

- MISA Investment License

Category: Legal & Registration | Applicability: Foreign companies in KSA | Issuing Authority: MISA | Notes: Required for foreign companies operating in KSA.

- GOSI Certificate

Category: Compliance & Labor | Applicability: If applicable | Issuing Authority: GOSI | Notes: Social insurance registration.

- Saudization (Nitaqat) Certificate

Category: Compliance & Labor | Applicability: Required where buyer or regulatory rules apply | Issuing Authority: Ministry of Human Resources / Nitaqat | Notes: Shows Saudization compliance.

5.5 IT Sector-Specific Documents

- CITC / CST License

Category: IT Sector License | Applicability: Telecom / IT services | Issuing Authority: CITC / CST | Notes: Relevant for IT infrastructure, telecom, and digital services.

- CST / NCA License or Compliance Evidence

Category: IT / Cybersecurity Compliance | Applicability: IT, cybersecurity, and digital infrastructure | Issuing Authority: CST / NCA | Notes: Relevant where cybersecurity/digital infrastructure compliance applies.

5.6 Optional Capability and Credibility Documents

- Company Profile

Category: Capability & Credibility | Applicability: All vendors | Issuing Authority: Vendor-issued | Notes: PDF company profile.

- ISO Certifications

Category: Capability & Credibility | Applicability: If available | Issuing Authority: ISO certification body | Notes: Examples: ISO 9001, ISO 27001, ISO 20000, ISO 22301.

- Past Project References

Category: Capability & Credibility | Applicability: All vendors | Issuing Authority: Client-issued / vendor-submitted | Notes: Relevant project experience and references.

- Client Recommendation Letters

Category: Capability & Credibility | Applicability: If available | Issuing Authority: Previous clients | Notes: Improves buyer trust.

6. Proposal Packaging and Format

Mushtarry platform only

6.1 Technical Proposal

File Naming Convention	Technical_[Bidder Name]_TND-IT-001_Data Center Infrastructure Upgrade.pdf
-------------------------------	---

- Cover Page including tender reference, project title, bidder legal name, contact details, date, signature, and stamp.
- Company Profile including legal structure, headquarters, core business, KSA presence, and relevant experience.
- Executive Summary describing the proposed solution and how it addresses the buyer's objectives.
- Understanding of Scope of Work and Project Objectives.
- Proposed Technical Solution and Compliance with Specifications.
- Implementation Methodology including migration approach, rollback plan, testing plan, and risk management.
- Project Timeline, Milestones, and Resource Plan.
- Project Team Structure, Roles, CVs, Certifications, and Relevant Experience.
- Warranty, SLA, Support Model, and Handover Plan.
- Technical Compliance Matrix.
- Mandatory, Conditional, Sector-Specific, and Optional Document Checklist.
- Deviation and Exception Statement, if any.

6.2 Commercial Proposal

File Naming Convention	Commercial_[Bidder Name]_TND-IT-001_Data Center Infrastructure Upgrade.pdf
Accepted Currencies	SAR

- Commercial proposal must be submitted separately from the Technical Proposal.
- All prices must be quoted in Saudi Riyals (SAR), unless otherwise approved by the buyer.
- The bidder must provide an itemized pricing breakdown covering hardware, software, implementation, support, warranty, and recurring costs.
- VAT and other applicable taxes must be shown clearly and separately.
- One-time and recurring costs must be clearly distinguished.
- The total proposed contract value must be shown in numbers and words.
- All commercial exceptions, assumptions, exclusions, and deviations must be clearly declared.
- The commercial proposal must remain valid for the required proposal validity period.
- The commercial proposal must be signed and stamped by the bidder's authorized representative.

7. Project Overview

Project Introduction

Mushtary Test Buyer, located in Riyadh, Saudi Arabia, is soliciting proposals from qualified IT infrastructure vendors for a comprehensive modernization of its existing data center environment. This project aims to enhance performance, reliability, security posture, and compliance with applicable Saudi cybersecurity requirements.

Background

The current data center infrastructure requires modernization to better support operational demands, security requirements, business continuity expectations, and regulatory compliance obligations. This procurement seeks to address performance limitations, improve infrastructure resilience, strengthen cybersecurity controls, and ensure a sustainable support model.

Context

This data center modernization initiative supports the buyer's broader digital transformation roadmap and operational resilience goals. The selected vendor is expected to provide a complete, tested, documented, and supportable solution that enables secure and reliable IT operations.

8. Objectives

Business Goals

- Improve overall data center performance, availability, and operational efficiency.
- Enhance reliability and reduce the risk of service interruption for critical IT services.
- Strengthen cybersecurity posture and align with applicable Saudi cybersecurity and digital infrastructure requirements.
- Provide the buyer's IT team with the training, documentation, and handover support required to operate the upgraded environment.

Expected Outcomes

- A modernized data center infrastructure including server hardware, core network switches, next-generation firewall, and backup systems.
- Successful migration of data to the upgraded infrastructure with zero data loss and controlled downtime.
- Complete as-built documentation, including architecture diagrams, configuration records, license details, and warranty information.
- A trained buyer IT team capable of operating, maintaining, and troubleshooting the upgraded infrastructure.

Key Performance Indicators

- 99.99% uptime for core data center services after modernization.
- At least 20% improvement in average response time for critical business applications, where baseline data is available.
- Zero data loss during data migration, verified through post-migration integrity checks.
- 100% completion of approved training and handover sessions.
- 100% completion of approved as-built documentation before final sign-off.
- Compliance with applicable Saudi cybersecurity and IT infrastructure requirements as reviewed by the buyer.

9. Scope of Work

Infrastructure Assessment & Solution Design

Comprehensive review of the existing data center environment and preparation of the target architecture, implementation approach, technical specifications, and bill of materials.

- Conduct a current-state assessment of the buyer's existing data center infrastructure.
- Identify performance, availability, security, backup, and operational gaps.
- Submit the Infrastructure Assessment Report within 10 business days of the kick-off meeting or site assessment, whichever is later.
- Develop a Proposed Solution Design including target architecture, technical specifications, Bill of Materials, network design, and security design.
- Obtain written buyer approval for the Proposed Solution Design before procurement or implementation activities begin.

Server Infrastructure Upgrade

Supply, installation, and configuration of approved server infrastructure to meet the technical and performance requirements of the project.

- Supply and install rack-mounted servers with dual-processor configuration, minimum 256GB RAM, and 20TB SSD RAID-6 configuration, unless otherwise approved by the buyer.
- Install and configure the approved operating system and virtualization platform.
- Configure hardware redundancy, storage, monitoring, and access controls in accordance with the approved design.
- Complete functional and performance testing before handover.

Network & Security Infrastructure Modernization

Supply, installation, and configuration of core switching and next-generation firewall infrastructure to improve network performance and security.

- Supply and install Layer 3 core switches with minimum 1Tbps switching capacity and redundant power supply units.
- Deploy a Next-Generation Firewall with IPS/IDS capabilities and minimum 10Gbps throughput, unless otherwise approved by the buyer.
- Configure VLANs, routing, network segmentation, access policies, firewall rules, and security hardening controls.
- Perform network, security, and integration testing before production handover.

Data Migration and Backup System Implementation

Secure transfer of data to the upgraded infrastructure and implementation of backup and recovery controls.

- Prepare a detailed migration strategy, rollback plan, testing plan, and downtime window for buyer approval.
- Execute migration activities during approved change windows only.
- Validate data integrity after migration and provide zero-data-loss evidence.
- Implement backup controls including daily full backups, weekly offsite backups, and Veeam-compatible backup workflows where applicable.
- Submit the Data Migration Completion Report after migration and validation activities are complete.

Training, Documentation & Post-Implementation Support

Training, documentation, warranty, support, and handover activities required to enable sustainable operation of the upgraded environment.

- Prepare and deliver training materials for buyer IT staff in Arabic and English.
- Provide as-built documentation including diagrams, configuration records, license details, warranty information, and operational procedures.
- Provide warranty and support services for the agreed warranty/support period.

- Support final UAT, handover, and buyer sign-off activities.

Execution Phases

1. Planning and Assessment Phase

- Conduct a kick-off meeting with buyer stakeholders to finalize project scope, objectives, communication protocols, and review process.
- Conduct the site/data center assessment and collect technical information required for design and planning.
- Submit the Infrastructure Assessment Report within 10 business days of the kick-off meeting or site assessment, whichever is later.
- Prepare and submit the Project Plan, including methodology, resource allocation, risk register, and proposed timeline.

2. Design and Approval Phase

- Develop the Proposed Solution Design, including target architecture, technical specifications, Bill of Materials, network design, and security design.
- Submit the Proposed Solution Design after the Infrastructure Assessment Report and allow a buyer review period before final approval.
- Revise the Proposed Solution Design based on buyer comments, where required.
- Obtain formal written approval for the final design, migration strategy, rollback plan, and testing plan before procurement or implementation activities.

3. Execution and Implementation Phase

- Procure and deliver approved server hardware, core network switches, next-generation firewall, backup system components, and related software.
- Install and configure all approved infrastructure components according to the approved design.
- Execute data migration only during approved change windows and in accordance with the approved rollback plan.
- Conduct functional, performance, security, backup, and integration testing.
- Deliver approved training sessions for buyer IT personnel.

4. Closure and Handover Phase

- Submit the Data Migration Completion Report including migration evidence, downtime confirmation, and zero-data-loss validation.
- Submit complete As-Built Documentation including diagrams, configuration records, license details, and warranty information.
- Conduct the final project closure meeting and complete operational handover.
- Obtain final UAT sign-off and buyer acceptance.
- Resolve agreed post-implementation punch-list items within the approved resolution period.

General Requirements

- All project documentation, deliverables, and communications must be provided in Arabic and English where required.
- All proposed designs, implementation plans, migration plans, documentation, and training materials require formal written buyer approval.
- The vendor must assign a dedicated Project Manager as the single point of contact for the buyer.
- All hardware and software components must be genuine, properly licensed, manufacturer-supported, and suitable for deployment in Saudi Arabia.
- The vendor must provide a detailed implementation methodology, migration strategy, rollback plan, risk register, testing plan, and handover plan.
- All change windows for infrastructure modifications or data migrations must be pre-approved in writing by the buyer at least 72 hours in advance.

- The vendor must comply with applicable NCA, CST/CITC, data protection, cybersecurity, and IT infrastructure requirements where applicable.
- The vendor must provide warranty and post-implementation support for the agreed support period.

10. Deliverables

10.1 Work Order Process

- The buyer may issue detailed Work Orders under the tender or contract, describing specific tasks, outputs, timelines, and acceptance criteria.
- The vendor shall respond within three (3) business days with assigned team lead, estimated duration, resource requirements, and cost breakdown where applicable.
- No work shall commence until the relevant Work Order, scope, deliverables, and acceptance criteria are approved by the buyer.
- Each Work Order shall be closed with completed deliverables, buyer acceptance, signed completion certificate, and valid invoice.

10.2 Required Deliverables

Infrastructure Assessment Report

Format: PDF

Deadline: Day 10 from contract award

Current state analysis and upgrade recommendations

Proposed Solution Design

Format: PDF

Deadline: Day 15 from contract award

Target architecture, technical design, BOM, network/security design

Upgraded Server Infrastructure

Format: System/Physical

Deadline: Day 75 from contract award

Rack-mounted servers installed and configured

Network & Security Equipment

Format: System/Physical

Deadline: Day 75 from contract award

Core switches and NGFW installed and configured

Data Migration Completion Report

Format: PDF

Deadline: Day 85 from contract award / within 24 hours after migration

Migration evidence, downtime confirmation, and zero-loss validation

Training Materials

Format: PDF/PPTX

Deadline: Day 90 from contract award

IT staff training in Arabic and English

As-Built Documentation

Format: PDF

Deadline: Day 90 from contract award

Network diagrams, configuration records, licenses, and warranty details

10.3 Approval Process

All major deliverables, including assessment reports, design documents, implementation plans, migration plans, test results, training materials, and as-built documentation, must be submitted for buyer review and written approval. The buyer will provide feedback or approval within the agreed review period. Final handover and UAT sign-off require formal buyer approval.

10.4 Reporting Requirements

- Weekly Project Status Report covering progress, completed tasks, upcoming activities, risks, issues, and mitigation actions.
- Change Request Log documenting all requested, approved, rejected, and implemented changes.
- Migration and Downtime Report confirming actual downtime, migration results, data integrity validation, and rollback readiness.
- Final Project Completion Report summarizing achieved outcomes, acceptance status, lessons learned, and handover confirmation.

10.5 Escalation Matrix

Level	First Escalation
Trigger Delay	1-2 calendar days
Contact Role	Vendor Project Manager and Buyer IT Focal Point
Level	Second Escalation
Trigger Delay	3-5 calendar days
Contact Role	Vendor Department Manager and Buyer Department Manager
Level	Final Escalation
Trigger Delay	More than 5 calendar days
Contact Role	Vendor Executive Management and Buyer Executive Management

11. Timeline

90 days implementation + 3 years warranty/support

Project Phases

- Phase 1: Assessment & Design (Days 1-15)
- Phase 2: Equipment Procurement & Delivery (Days 16-45)
- Phase 3: Installation & Configuration (Days 46-75)
- Phase 4: Data Migration, UAT & Handover (Days 76-90)

Key Milestones

Phase	Phase 1: Assessment & Design
Milestone	Infrastructure Assessment Report
Target Date	Day 10 from contract award
Phase	Phase 1: Assessment & Design
Milestone	Assessment & Design Approval
Target Date	Day 15 from contract award
Phase	Phase 2: Equipment Procurement & Delivery
Milestone	Equipment Delivery
Target Date	Day 45 from contract award
Phase	Phase 3: Installation & Configuration
Milestone	Installation & Configuration Complete
Target Date	Day 75 from contract award

Phase	Phase 4: Data Migration, UAT & Handover
Milestone	Data Migration & UAT Complete
Target Date	Day 85 from contract award

Phase	Phase 4: Data Migration, UAT & Handover
Milestone	Project Handover and Final Sign-Off
Target Date	Day 90 from contract award

12. Team Requirements

Project Manager

Responsibilities: Overall project planning, execution, monitoring, control, stakeholder communication, risk management, resource coordination, reporting, and adherence to scope, schedule, budget, and approved methodology.

Minimum Experience: Minimum 7 years in IT infrastructure project management, with at least 3 similar data center upgrade or deployment projects.

Lead Solutions Architect / Technical Lead

Responsibilities: Design the upgraded infrastructure, oversee server, network, security, backup, and virtualization architecture, validate technical compliance, lead design reviews, and guide the implementation team.

Minimum Experience: Minimum 8-10 years in IT infrastructure architecture, with experience in enterprise data center, networking, virtualization, and cybersecurity projects.

Server & Virtualization Engineer

Responsibilities: Install, configure, and optimize rack-mounted servers, storage, RAID configuration, operating systems, virtualization platforms, and backup integration.

Minimum Experience: Minimum 5 years in server administration and virtualization, with experience in VMware vSphere or Microsoft Hyper-V.

Network Engineer

Responsibilities: Install, configure, and test core switches, VLANs, routing, redundancy, network segmentation, connectivity, and enterprise network performance.

Minimum Experience: Minimum 5 years in enterprise networking, preferably with certifications such as CCNP, CCIE, or equivalent.

Security Engineer

Responsibilities: Install and configure next-generation firewall, IPS/IDS policies, security rules, hardening controls, security testing, and NCA/CST cybersecurity compliance requirements.

Minimum Experience: Minimum 5 years in cybersecurity or network security, with experience in NGFW deployment and Saudi cybersecurity compliance. Certifications such as CISSP, CISM, Fortinet, Palo Alto, Cisco Security, or equivalent are preferred.

Data Migration Specialist

Responsibilities: Prepare and execute the data migration plan, validate data integrity, manage downtime windows, test rollback procedures, and submit migration completion evidence.

Minimum Experience: Minimum 5 years in enterprise data migration projects with proven experience achieving controlled downtime and zero-data-loss targets.

Training Specialist / Technical Writer

Responsibilities: Prepare training materials, conduct user/administrator training, create bilingual technical documentation, and compile as-built documentation and operational handover manuals.

Minimum Experience: Minimum 3 years in technical documentation or IT training, with Arabic and English documentation capability.

Saudization

The vendor shall comply with applicable Saudization requirements. For this project, the bidder should submit a Saudization plan, identify Saudi nationals in the proposed team, and demonstrate local support capability. A minimum

30% Saudi participation in the on-site project team is preferred unless a higher percentage is required by law or buyer policy.

13. General and Special Terms

13.1 Legal Terms

- This RFP and any resulting contract shall be governed by the laws and regulations of the Kingdom of Saudi Arabia.
- The competent courts in Riyadh, Kingdom of Saudi Arabia, shall have jurisdiction over disputes unless otherwise stated in the final contract.
- Submission of a proposal implies acceptance of the tender conditions, unless exceptions are clearly declared in the bidder's deviation statement.
- No binding contractual relationship shall exist until a formal written agreement is signed by authorized representatives of both parties.
- The buyer reserves the right to cancel, amend, extend, partially award, reject all proposals, or accept any proposal in whole or in part.
- The vendor shall indemnify and hold harmless the buyer against claims, losses, liabilities, damages, and costs arising from vendor breach, negligence, misconduct, or non-compliance.
- The vendor must provide all required licenses, permits, authorizations, and regulatory approvals necessary to deliver the required services in Saudi Arabia.
- A bid security of 2% of submitted bid value is mandatory and must remain valid for at least 120 days from the bid submission deadline, unless otherwise stated.
- The successful bidder shall submit a performance bond of 5.0% of the contract value, valid for the full implementation period and the 3-year warranty/support period.
- A retention amount of 10.0% may be withheld from payments until final acceptance and completion of contractual obligations and/or warranty observation requirements.
- Liquidated damages shall apply for vendor-attributable delay at the rate of 0.5% of delayed milestone value per week, capped as per final contract.

13.2 Compliance Requirements

- The vendor must comply with all applicable Saudi laws, regulations, commercial rules, labor rules, and technical standards.
- The vendor must comply with applicable cybersecurity, telecommunications, data protection, and IT infrastructure requirements, including NCA/CST/CITC requirements where applicable.
- The vendor must maintain all required legal, tax, banking, signatory, and sector-specific documents throughout the tender and contract period.
- All supplied hardware and software must be genuine, properly licensed, manufacturer-supported, and suitable for use in Saudi Arabia.
- The vendor must comply with applicable Saudization and local labor requirements.
- The bidder should submit relevant vendor certifications and applicable ISO certifications, including ISO 27001 and ISO 9001 where available.

13.3 Language Requirements

Arabic and English; Arabic takes precedence in case of conflict.

13.4 Equipment and Logistics

The vendor shall be responsible for sourcing, logistics, customs clearance where applicable, transportation, delivery, installation, configuration, testing, and commissioning of all required equipment and software. All related costs must be included in the commercial proposal unless explicitly excluded and accepted by the buyer.

14. Confidentiality

All information exchanged between the buyer and bidders, including RFP contents, technical specifications, commercial offers, system information, designs, credentials, data, and proposed solutions, shall be treated as strictly confidential and shall not be disclosed to any third party without prior written consent. The confidentiality obligation continues beyond the tender process and any resulting contract.

15. Evaluation Methodology

Evaluation Model	70% Technical / 30% Financial
Technical Evaluation	70%
Financial Evaluation	30%
Minimum Technical Score	70%
Award Basis	The contract will be awarded to the bidder offering the most economically advantageous proposal, based on 70% Technical / 30% Financial, provided the bidder passes all mandatory criteria and achieves a minimum technical score of 70%.

15.1 Mandatory Pass/Fail Criteria

- Late submission after official platform deadline.
- Failure to submit mandatory legal registration documents.
- Failure to submit required technical proposal.
- Failure to submit separate commercial proposal.
- Failure to provide bid security if required.
- Conflict of interest not disclosed.
- Vendor is blacklisted, suspended, or legally restricted.
- Minimum 5 years of relevant IT infrastructure project experience in KSA.
- Minimum 3 completed similar IT infrastructure/data center projects.
- Valid relevant CST/CITC/NCA-related license, permit, or applicability explanation for IT/cybersecurity/digital infrastructure work.
- Valid Saudi legal, tax, address, banking, and authorized signatory documentation.

15.2 Technical Evaluation Parameters

- Completeness of the technical proposal, including all required sections, attachments, compliance matrices, and supporting documents.
- Clarity, readability, organization, and internal consistency of the technical proposal.
- Alignment of the proposed solution with the scope of work, buyer objectives, technical requirements, and expected outcomes.
- Realism and achievability of the proposed project timeline, delivery schedule, milestones, and resource plan.
- Technical approach and solution quality.
- Compliance with technical specifications and stated requirements.
- Methodology and implementation plan.
- Migration strategy, rollback plan, and testing approach.
- Key personnel qualifications and team structure.
- Relevant experience and similar completed projects in KSA.
- Required certifications and valid sector licenses.
- Warranty, SLA, support model, and handover quality.
- Saudization and local support capability.

15.3 Financial Evaluation Parameters

- Total proposed price and itemized cost breakdown.
- Value for money, not lowest price alone.
- Price competitiveness against other compliant offers.

- Cost realism and absence of abnormally low or suspicious pricing.
- Alignment with buyer payment terms.
- Total cost of ownership including support and warranty.
- VAT and tax compliance within pricing.
- Commercial exceptions or deviations.
- Price validity period.
- Cost transparency and absence of hidden charges.

15.4 AI-Assisted Recommendation Note

Mushtarry may assist the buyer by summarizing proposals, checking mandatory compliance, comparing technical and commercial alignment, reviewing vendor document status, considering category-specific vendor reputation indicators, delivery reliability, rating history, completed contract history, compliance signals, and AI risk indicators, and preparing a ranked recommendation against buyer-approved criteria. AI output is advisory only and cannot publish, reject, award, or finalize any tender decision. Final award requires buyer approval.

16. Payment Terms

16.1 Payment Basis

Payments shall be milestone-based and subject to the buyer's written acceptance of each milestone. Payment shall be made as follows: 20% upon contract award and submission of required guarantees, 40% upon equipment delivery and buyer acceptance, 30% upon successful handover/UAT, and 10% after completion of the agreed warranty observation or retention period, unless otherwise stated in the final contract.

16.2 Invoice Requirements

- Valid tax invoice issued by the vendor.
- Official Purchase Order or contract reference.
- Signed milestone acceptance certificate or completion certificate.
- Supporting delivery, installation, handover, or UAT documentation as applicable.
- VAT registration number and tax details where applicable.
- Valid vendor banking details matching the approved IBAN certificate or bank letter.

16.3 Payment Timeline

Approved invoices shall be processed within thirty (30) calendar days from receipt of a valid, complete, and buyer-approved invoice, unless otherwise stated in the final contract.
